

## Post Graduate Diploma in Intellectual Property Rights & Patents

In recent years we have been frequently hearing about the Intellectual Property Rights or IPR, in short. The idea of ownership has given rise to the concept of property. Till recently, the term property was always thought of in relation to some tangible assets, whose ownership could be established easily. In the new age of knowledge based society, the idea of having ownership rights in the intellectual creations has acquired strength and urgency. With globalization, India also has had to gear up for a paradigm shift from knowledge sharing society to knowledge owning society. This course on patents and patent drafting is designed to provide a general overview of intellectual property and to suggest useful practices for the handling of patent issues in the corporate setting. This course comprises of four modules addressing various processes involved in patent drafting.
