Cliniminds-Medeva Launches India's

First Specialised Pharmaceutical Business Analytics Program

Cliniminds is pleased to announce the launch of India's first Industry Academia program in pharmaceutical business analytics, in collaboration with Medeva, a leading health sciences AI and Analytics Company. This Program would initially be offered in New Delhi NCR Region and Hyderabad. As a part of the program, students would get 3-month paid hands-on internship at Medeva. Program would focus on domain knowledge on healthcare and pharma, primary & secondary research skills, big data, project management, consulting skills, hands-on training on R, Python, Advanced Excel, Tableau, and several other skills.

Upon completion of the program, students would be offered job placement opportunities with pharmaceutical and healthcare analytics firms.

On this occasion, Mr. Karthikayan V, Co-founder, Medeva, said, "The program would help students in learning analytics with a clear focus on a very important and emerging sector-Healthcare. This program would prepare students for long-term career opportunities."

Mr. Kamal Shahani, Managing Director, Cliniminds said that the program would provide a unique opportunity for the students to learn hands-on, as the program is designed in line with the business analytics job role. He said Cliniminds experience and track record in placement would ensure that students get job placements.
